On behalf of an important client, we are looking for the following:

IT SECURITY ARCHITECT

Responsibilities:

- Define and maintain enterprise IT security architecture standards, frameworks, and guidelines.
- Ensure compliance with regulatory, and industry best practice standards (PCI-DSS, NIST CSF).
- Design and review IT systems, applications, and infrastructure by translating business requirements into secure technical solutions.
- Apply architectural principles such as Zero Trust, Defense in Depth, and integration with Automated Detect & Response.

Requirements:

- Degree in computer science, cybersecurity, IT architecture, or equivalent specialization.
- 5 years of proven experience as an IT Security Architect or in a similar senior security or Architecture role.
- Experience with risk assessments, threat modeling, and security architecture reviews.
- Strong knowledge of security frameworks and standards such as NIST CSF. Experience with PCI-DSS would be a plus.
- Security certifications such as (CISSP, CISM, SABSA, TOGAF, or equivalent) are a plus.
- English is mandatory, with Italian being a strong advantage. German is a plus.

Soft Skills:

- Strong communication capabilities and teamwork skills.
- Leadership personality and capability at structured analysis and abstraction.

We invite candidates to send their application directly by e-mail to our consultant Mr. Alberto Largader (largader@lwphr.ch). Only profiles matching
